

NMC Installation & Assembly of NMC 'GE' Coupling

- 

1. Ring, housing and bolts, ready for assembly - a spanner is the only tool needed.
- 

2. Thoroughly lubricate Inside and outside of rubber ring with Vegetable based lubricant. This avoids pinching or nipping of the ring. Recommend use of 'NMC' Lubricant.
- 

3. Slip the ring over one pipe and bring both the pipe ends together.
- 

4. Slide the ring into central position over the pipe ends.
- 

5. Put on the sections of the housing and insert the bolts and nuts.
- 

6. Bolt up evenly until the nuts are fully tightened. Ensure that the bolt sections of the half housings meet, metal to metal.
